# Experiencing Heaven Now

You are invited to attend this free lecture on Christian Science by Mary Bothwell, C.S.B.  
~ a Christian Science Practitioner and Teacher, and member of the Board of Lectureship.

We all yearn to find meaningful relationships, or a more lasting connection with peace, contentment, even health. In my lecture, I'll discuss how anyone can become genuinely aware of God's presence and experience heaven--harmony, health, and happiness--here and now.

I'll also share how the study of the Bible, and a book that explains the healing relevance of the Bible, *Science and Health with Key to the Scriptures* by Mary Baker Eddy, can open up a new meaning of heaven to each of us. This heaven isn't a place, but a tangible feeling of being enveloped in love and spirituality that comes from understanding more about God. We'll explore the new perspectives that come from this understanding of God--healing perspectives that can resolve all kinds of difficulties, and transform our lives for good.
